

# Federal Aviation Agency

AC NO : 20-45

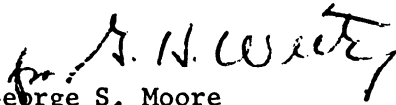

AIRCRAFT

EFFECTIVE :

9/17/65

SUBJECT : SAFETYING OF TURNBUCKLES ON CIVIL AIRCRAFT

- 
1. PURPOSE. To provide information on turnbuckle safetying methods that have been found acceptable by the Agency during past aircraft type certification programs.
  2. INFORMATION. The following cable system turnbuckle safetying devices have been approved, under current airworthiness regulations, for use in civil aircraft:
    - a. Clip locking devices specified in military standard MS 33736;
    - b. Double-wrap safety wire as specified in military standard MS 33591; and
    - c. Turnbuckle safetying devices meeting TSO-C21.

  
George S. Moore  
Director  
Flight Standards Service
